2-Day

CMMC & DFARS/NIST 800-171 Requirements Training
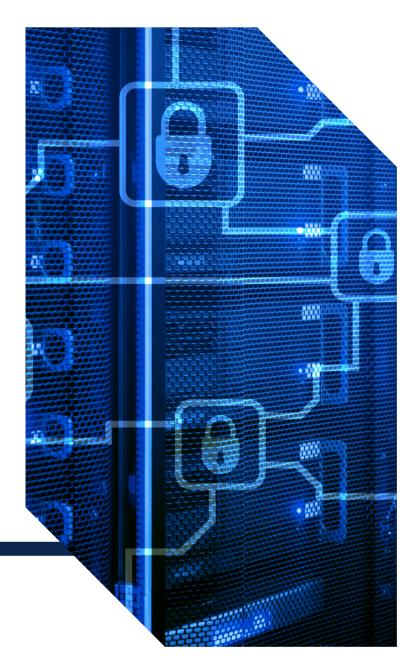

At A Glance

Understanding the requirements of CMMC for DoD Contractors within the Defense Industrial Base

This two-day course provides participants with awareness and understanding of the requirements of the CyberSecurity Maturity Model Certification (CMMC) and NIST SP 800-171. The intent of this training is to provide the necessary background information to enable individuals to have the necessary knowledge to prepare and assist a company with preparing for a CMMC assessment.

Who Should Attend

Individuals who are looking to have a comprehensive and holistic understanding of CMMC and NIST SP 800-171. This course applies to both the employees of companies who are looking to get certified as well as those who are attempting to get a better grasp of CMMC.

Seminar Goals

- Understand the past, present, and likely future of CMMC
- Walk away with the knowledge to step in and assist a company in preparation for a CMMC assessment

Seminar Outline

Day One:

- Introduction and Welcome
- History of CMMC and NIST SP 800-171
- What is FCI and CUI
- DFARS
- CMMC Ecosystem and Roles
- CMMC Scoping
- FedRAMP
- CMMC Assessments

Day Two:

- Step by Step walkthrough of all 110 controls in NIST 800-171 Revision 2
- Understanding common ways to meet each control
- How to interpret each control correctly
- Technology and documentation examples

Attendees successfully completing the examinations provided in conjunction with this course receive a Certificate of Completion from Apex Quality Assurance.
