At A Glance

Understanding the Requirements of VDA ISA TISAX and ISO/IEC 27001:2013 for Information Security Management Systems

This two-day course provides participants with awareness and understanding of the requirements of the TISAX information security assessment maturity model (ISA released by the VDA) and illustrates important linkages to the controls and requirements from the information security management systems standard ISO/IEC 27001:2013. The intent of this training is to provide awareness and understanding of the information and asset security management system framework and maturity levels required to achieve the organization's desired TISAX certification label.
Seminar Goals

- Understand the application of Information Security Assessment principles, and maturity of controls

- Relate the Information Security Management system clauses of ISO/IEC 27001:2013 to the organizational information, assets, product designs, services, activities and operational processes

- Relate organization's context and interested party needs and expectations to security risk assessment, planning and implementation of an organization's Information Security Management system

Who Should Attend

An understanding of the ISO/IEC 27001:2013 requirements, controls and/or work experience in applying ISO/IEC 27001:2013, as well as other ISO ISMS standards in the 27000 series is recommended.

An understanding of Risk Management for Information Security Management – there is a whitepaper available on the VDA TISAX information portal – is also important. .

Seminar Outline

Understanding the Requirements of VDA ISA TISAX and ISO/IEC 27001:2013 for Information Security Management Systems
